

Strap Attachment for Classical Guitars:

Your guitar is worth it.

Classical guitars are not equipped with strap pins. However, Levy's provides several strap designs specifically for these guitars. Each strap consists of a closed loop, worn around the neck, or over one shoulder and under the opposite arm.

Note: When using a classical guitar strap on a classical guitar, the player *must at all times* keep at least one hand on the guitar to prevent it from tipping forward and falling.
